FOR IMMEDIATE RELEASE

Plano, Texas September 24,2024

Luminator Technology Group to Showcase Latest Innovation, RoadRunner Pro, at APTA Transform

[Luminator Technology Group](#) ("Luminator") is excited to announce that we will be showcasing our latest innovation, RoadRunner Pro, at APTA Transform on September 30th. This new mobile video system has been redefined to have cutting-edge capabilities and a user-friendly design, paired with our mSET software.

The RoadRunner Pro offers a range of advanced features designed specifically for the transit market, providing customers with superior flexibility and enhanced durability. The on-board system supports up to 24 camera channels with AI capabilities and is backward compatible. The new features include:

- High-quality 4K video streams, ensuring the highest quality video is available for reviewing critical incidents.
- The Road Runner Pro supports up to 12 channels of analog HD and 12 channels of digital IP camera and up to 23 channels of audio input, providing robust video/audio capabilities.
- Five-year warranty on the DVR and a two-year warranty on the rest of the system.
- AI capabilities include ADAS support, Driver behaviors, Blind Spot detection, and Object detection (wheelchair vs bicycle vs stroller).
- Supporting complete fleets of all vehicle types, the system is equipped with an 8-core processor and a neural network inference engine for intelligent algorithm applications.
- Designed and manufactured specifically for transit applications, the RoadRunner Pro is designed to deliver seamless, high-performance management for multiple Transit applications. ensuring reliability and efficiency on the go.
- Fully compatible with our INFOtransit systems. Leveraging the AI capabilities of this open platform solution can lead to the development of smarter transit systems that optimize real-time conditions and provide timely updates.

"We are excited to bring RoadRunner Pro to the market," said Daria van Engelen, Commercial Vice President of North America. "Used either individually or combined with our mSET software, this solution represents our commitment to innovation, and we believe it will significantly enhance the mobile video experience for our customers' needs - whether that's for advanced video analytics, networking options or video accessibility."

The RoadRunner Pro will be available starting October 2024. Customers can learn more about the new solution at the APTA Transform Conference on September 30th, at booth #601 or visit www.luminator.com for more information.

About Luminator Technology Group Global, LLC

Luminator Technology Group delivers globally recognized technology solutions that increase intelligence, safety, and efficiency for public transit operations. Luminator Technology Group (Luminator) was established and is purposefully architected to make a lasting impact on the transit technology market. Combining strategic research and development with smart acquisitions, we are merging a broad range of expertise and new technology along with best-in-class products from successful, well-known regional companies into one cohesive, global organization.

Luminator is uniquely positioned to provide solutions to connect transit passengers to vital information while supporting the operational objectives of efficient transit operations. Supporting transit bus and rail car manufacturers as well as public transit operators around the globe, Luminator is developing and delivering technology with tangible benefits to public transit.
