Plano, Texas October 4, 2024

**Luminator Technology Group Partners with CDTA to Implement Video Mirror System
Pilot will feature two buses with new technology**

Luminator Technology Group in partnership with The Capital District Transportation Authority (CDTA) (powered by Gauzy), is excited to announce the installation of a mirrorless driver assistance system.

CDTA received an exemption from the New York State Department of Motor Vehicles to remove the side mirrors on CDTA buses. On Thursday, October 3, mirrors were removed from two CDTA 40-foot buses to continue piloting the system. CDTA has been piloting the technology for more than a year, but with side mirrors remaining on the buses.

There are several expected benefits to the having the video system, including increased safety for operators and a reduction in accidents. The use of the camera monitor system reduces glare, reduces lateral blind spots, and the high-resolution camera provides a wider and clearer view than traditional mirrors, especially during inclement weather

"We're excited pilot this mirrorless driver assistance system," said CDTA CEO Carm Basile. "Bus operators have been working with the system for a few months and the feedback has been all positive. The camera is sharp and helps with visibility, especially at night. Taking the mirrors off will also make the bus less wide, making it easier for operators to navigate tight city streets."

"We are so pleased to partner with CDTA and pioneer the video mirror solution in North America which will have a positive impact for all transit agencies providing improved safety for the driver during all lighting and weather conditions. The feedback from surveys with drivers so far has been overwhelmingly positive as their environment onboard the bus has improved" said Magnus Friberg, CEO of Luminator Technology Group.

About Luminator Technology Group Global, LLC

Luminator Technology Group delivers globally recognized technology solutions that increase intelligence, safety, and efficiency for public transit operations. Luminator Technology Group (Luminator) was established and is purposefully architected to make a lasting impact on the transit technology market. Combining strategic research and development with smart acquisitions, we are merging a broad range of expertise and new technology along with best-in-class products from successful, well-known regional companies into one cohesive, global organization.

Luminator is uniquely positioned to provide solutions to connect transit passengers to vital information while supporting the operational objectives of efficient transit operations. Supporting transit bus and rail car manufacturers as well as public transit operators around the globe, Luminator is developing and delivering technology with tangible benefits to public transit.
