

*For fleets that need dependable,
modern video—built to fit and
easy to operate.*

SAFETY AND SECURITY SOLUTIONS

INTRODUCING ROADRUNNER™ EDGE

Designed for essential fleet video needs and everyday reliability

SAFETY AND SECURITY SOLUTIONS

ROADRUNNER™ EDGE

Designed for teams prioritizing simplicity, reliability, and fast deployment for everyday transit operations. The RoadRunner Edge delivers dependable onboard video that helps improve rider safety, strengthen security, and enhance the overall passenger experience.

Built to support mid-market agencies and smaller fleets, it provides right-sized video coverage across a wide range of vehicle types, from smaller buses and shuttles to standard transit vehicles, with ease of use and cost efficiency.

Mix RoadRunner Edge and RoadRunner Pro, for more complex operations, across fleet environments with centralized management through Luminators video software, mSET.

Focused Simplicity

With simple deployment and day-to-day operation, the system provides the essential capabilities agencies need without added complexity. Designed for defined use cases and mixed fleet environments, it ensures reliable performance across everyday transit applications.

Proven Reliability

RoadRunner Edge is engineered to function in demanding environments where consistent video performance is critical. It delivers dependable operations to ensure incidents are recorded, supporting faster resolution and greater confidence for both operators and riders.

Features

- **Optimized for Standard Fleet Deployments**
Supports up to 8 PoE RJ45/M12 IP cameras for consistent onboard coverage
- **Reliable Video for Everyday Operations**
Designed to ensure critical events are recorded and accessible when needed
- **Flexible Connectivity Options**
Built-in WiFi and GPS support for complete fleet visibility
- **Flex-Future Camera Support**
Supports industry-standard PoE IP cameras with analog support for lag-free flexibility in retrofit environments
- **Rugged, Transit-Ready Design**
Engineered to withstand vibration, temperature extremes, and continuous vehicle operation
- **Seamless Integration with Luminator Ecosystem and Software**
Enables centralized monitoring, video retrieval, and operational visibility through the scalable mSET platform

*One video platform to manage
all onboard video security
across your mixed fleet.*
